## Short Range Radio Certificate

As noted in **SAMSA Notice 6 of 2015** which states:

“Due to the cessation of the SOLAS watch keeping by the South African Coast Stations on 29 Mhz **it will no longer be appropriate for small vessels to carry 29 Mhz radios as a safety option** in terms of item 18, Annexure 2 of the Merchant Shipping (National Small Vessel Safety) Regulations 2007.”

All small vessels going to sea as from 01/01/2016 must be equipped with a VHF radio to comply with the small vessel safety regulations. We currently offer the Short Range Certificate training as well as the VHF conversions to the Short Range Certificate. As of April 2018 the old VHF Radio Certificate will no longer be valid as all VHF radios will have to be equipped with DSC capabilities. A Short Range Certificate will then be an operating requirement.

### Course Duration incl. exam:

Part Time: 5 Evenings  
Full Time: 2,5 Days

### Conversion Duration incl. Exam:

Part Time: 3 Evenings  
Full Time: 2 Days

### Costs including examinations and Short Range Certificate:
